ABOUT ME

Full Stack Developer with experience building scalable web applications using React.js, Node.js, and PostgreSQL. Skilled in designing REST APIs, implementing secure authentication systems, and developing data-driven applications. Familiar with cloud platforms (AWS, GCP) and focused on building efficient, production-ready systems.

EDUCATION

Vidyalankar Institute Of Technology

B.Tech in Information Technology (CGPA: 9.56/10, up to Semester 5)

Mumbai, India

2023 – Present

PROJECTS

ReportForge – Document Editor & Report Generator | Next.js, TypeScript, Supabase, PostgreSQL, Flask, Python, Tailwind CSS

Live: <https://reportforge-neon.vercel.app> | **Code:** <https://github.com/Niraj1232005/reportforge.git>

- Engineered a full-stack document editor enabling structured academic and technical report creation with A4 preview and seamless DOCX export.
- Designed and implemented secure authentication using Supabase (OAuth + email) with Row-Level Security (RLS), ensuring user-isolated data access and protection.
- Built a Flask-based document generation service to automate formatting of headings, layouts, and media, ensuring consistent and production-ready outputs.

Voynex | React, TypeScript, Supabase, JWT, Tailwind CSS, Shadcn UI, Stripe/Razorpay, Weather API, OpenAI

Code: <https://github.com/Niraj1232005/voynex>

- Developed a full-stack travel platform for trip discovery, booking, and AI-driven packing recommendations based on user preferences and destinations.
- Implemented a dynamic trip builder and personalized packing system, improving user planning efficiency and decision-making.
- Architected a scalable system with JWT-based authentication, role-based access control, and integrated third-party APIs for payments, weather, and AI features.

BookAlchemy | Python, Streamlit, Scikit-learn, Pandas, NumPy, TF-IDF, KNN

Code: <https://github.com/Niraj1232005/book-recommendation-system-ml-knn.git>

- Built an ML-based recommendation system using KNN and TF-IDF to deliver personalized book suggestions based on user ratings and content similarity.
- Enhanced search accuracy by implementing hybrid retrieval combining RapidFuzz fuzzy matching with semantic TF-IDF search, enabling typo-tolerant queries.
- Developed an interactive Streamlit dashboard with visual analytics (Matplotlib, Seaborn) to uncover trends in ratings, publications, and author popularity.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, Supabase

Tools: Git, VS Code, Postman

Cloud: AWS, GCP

Other: API Integration, Authentication Systems, System Design Basics

OS: Linux, Windows

CERTIFICATIONS

Cloud Computing Bootcamp

Completed training on cloud fundamentals, deployment models, and scalable systems

C-DAC Pune

Introduction to Blockchain Technology and its Use Cases

Completed bootcamp covering blockchain fundamentals and real-world applications

C-DAC Hyderabad
