ABOUT ME

I am Backend-focused developer with experience in developing and deploying scalable applications using cloud platforms. Strong foundation in data structures, algorithms, and system design principles. Keen to leverage DevOps practices and emerging technologies to build reliable, high-performance solutions.

EDUCATION

Vidyalankar Institute Of Technology

B.Tech in Information Technology (GPA: 9.48/10)

Mumbai, India

2023 – Present

PROJECTS

SaaS-Based Dynamic Document Automation Platform | *Next.js, TypeScript, Supabase, PostgreSQL, Flask, Python, Tailwind CSS* | **Repo**

- Built a full-stack document automation platform using Next.js and Flask that allows users to upload Word templates and generate customized documents dynamically.
- Implemented secure authentication and role-based access control using Supabase OAuth (GitHub/Google) with Row-Level Security (RLS) for protected file storage and database operations.
- Developed a template engine that extracts placeholders from Word files and dynamically generates forms and final documents based on user input.

AeroCast | *Node.js, Express, EJS, REST APIs, Docker (Planned), CI/CD (Planned)* |

| **Repo**

- Implemented secure configuration management using environment variables (.env) to protect API keys and enable production-ready deployment practices
- Structured the application for containerization using Docker, preparing it for consistent deployment across different environments
- Planned CI/CD pipeline integration using GitHub Actions to automate build, test, and deployment workflows

Voynex | *React, TypeScript, Supabase, JWT, Tailwind CSS, Shadcn UI, Stripe/Razorpay, Weather API, OpenAI* |

Repo

- Built a full-stack travel planning platform enabling trip discovery, booking, and AI-based packing recommendations based on destination, weather, and planned activities.
- Implemented core features such as a custom trip builder, personalized packing lists, and secure user flows using modern web technologies.
- Designed a responsive and scalable architecture with secure authentication, role-based access control, and seamless third-party API integrations.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS

Frameworks/Libraries: Python, React, Node.js Express.js, React Query

OS: Windows, Linux

Serverless Platforms: AWS, GCP

Databases: MySQL, PostgreSQL

Developer Tools: Git, VS Code, Postman, Supabase

CERTIFICATIONS

Cloud Computing Bootcamp

Completed training on cloud fundamentals, deployment models, and scalable systems

C-DAC Pune

Introduction to Blockchain Technology and its Use Cases

Completed bootcamp covering blockchain fundamentals and real-world applications

C-DAC Hyderabad
